

COMPLETE LIQUID FILLING LINE RPL50

**25-50 CONTAINER/MIN
500-5000ML**

RADAN
INDUSTRIAL GROUP

The RPL50 complete liquid packaging line is a professional solution designed to handle all stages of filling, capping, and labeling in a fully synchronized and integrated process. Its modular and customizable design allows easy adjustment for various bottle types and liquid products, delivering an efficient performance of 25 to 50 containers (up to 4 liters each) per minute. With a hygienic stainless-steel structure, minimal product waste, and high system coordination, this line is an ideal choice for enhancing the quality and efficiency of liquid packaging operations.

Other specifications:

Filling Section

servo-driven piston filling machine with 8 to 12 nozzles:

RPF3000: Suitable for filling viscous and thin liquids in containers from 200 to 3000 ml.

RPF5000: Suitable for filling viscous and thin liquids in containers from 400 to 5000 ml.

Capping Section

Dual-Head Capping Machine: simultaneous capping of two round containers, equipped with servo motor

Single-Head Capping Machine: For round containers – with automatic cap feeder.

Labeling Section

Dual-Purpose Labeling Machine: Capable of labeling various round and flat containers with high accuracy and speed.

Options:

Induction Sealing Machine

Inkjet Printer

Carton Sealing Machine

Rotary Collection Table

In industries:

Chemical products: detergents, engine oils

Cosmetic and personal care products: shampoos, creams, lotions

Pharmaceutical products: syrups, hygienic and antiseptic solutions

Food products: sauces, edible oils, juices
