

COMPLETE LIQUID FILLING LINE RPL80

40-80 CONTAINER/MIN

50-1000ML

The RPL80 complete liquid packaging line is a professional solution designed to handle all stages of filling, capping, and labeling in a fully synchronized and integrated process. Its modular and customizable design allows easy adjustment for various bottle types and liquid products, delivering an efficient performance of 40 to 80 containers (up to 1-liter each) per minute. With a hygienic stainless-steel structure, minimal product waste, and high system coordination, this line is an ideal choice for enhancing the quality and efficiency of liquid packaging operations.

RADAN
INDUSTRIAL GROUP

Other specifications:

Filling Section

servo-driven piston filling machine with 10 or 12 nozzles:

RPF1000: Suitable for filling viscous and thin liquids in containers from 50 to 1000 ml.

Capping Section

Dual-Head Capping Machine: simultaneous capping of two round containers, equipped with servo motor.

Spindle Capping Machine: Suitable for flat, pump, trigger, and jar caps – equipped with automatic cap sorter and cap feeder.

Trigger Capping Machine: Suitable for flat, pump, trigger, and jar caps.

Labeling Section

Dual-Purpose Labeling Machine: Capable of labeling various round and flat containers with high accuracy and speed.

Options:

Induction Sealing Machine
Inkjet Printer
Carton Sealing Machine
Rotary Collection Table

In industries:

Chemical products: detergents, engine oils
Cosmetic and personal care products: shampoos, creams, lotions
Pharmaceutical products: syrups, hygienic and antiseptic solutions
Food products: sauces, edible oils, juices
